INDEX OF SUBJECTS

Acetylcholine:
Receptors in cockroach blocked by lophotoxin (BLAGBURN and SATTELLE) **137**, 603
Acid–base regulation:
In *Bufo marinus* during hypercapnia (BOUTILIER and HEISLER) **134**, 79
—In trout following acute acidosis (TANG, NOLAN and BOUTILIER) **134**, 297
—In crayfish exposed to air (TYLER-JONES and TAYLOR) **134**, 409
—In a lamprey (MATSOFF and NIKINMAA) **136**, 351
—In exercised trout (WOOD) **136**, 461
—In crayfish (BURTIN and MASSABUAU) **137**, 411
—In dogfish uterus (KORMANIK) **137**, 443
—In a freshwater mussel (HEMING, VINOGRADOV, KLERMAN and KOMOV) **137**, 501
—In reptiles (STINNER and WARDLE) **137**, 529
—In a marine teleost (CLAIBORNE and EVANS) **140**, 89
—In the grasshopper (HARRISON) **140**, 421
Acid–base variables:
Effect on trout hepatocytes (WALSH, MOMMSEN, MOON and PERRY) **135**, 231
Acid tolerance:
Interspecific variation in fish (FREDA and MCDONALD) **136**, 243
—Of a lamprey (MATSOFF and NIKINMAA) **136**, 351
Action potentials:
Of a cockroach motoneurone, effect of anoxia (PITMAN) **135**, 95
—Of insect flight muscles, effect of temperature (ESCH) **135**, 109
—Ionic dependence of, in *Beroe ovata* smooth muscle (BILBAUT, MEECH and HERNANDEZ-NICAISE) **135**, 343
—In leech salivary gland cells (WUTTKE and BERRY) **138**, 431
—Cause peptide hormone release in the neurohypophysis (BICKNELL) **139**, 51
—In pituitary neurosecretory cells (MCBURNEY and KEHL) **139**, 317
Action spectrum:
Of the response of *Paramecium bursaria* to light (IWATSUKI and NAITOH) **134**, 43
—For phototaxis of *Paramecium* (MATSUOKA and NAKAOKA) **135**, 477
Acuity:
Of vision in octopuses (MUNTZ and GWYTHER) **134**, 119
Adhesion:
In the aphid (LEES and HARDIE) **136**, 209
Adrenaline:
Effect on proton extrusion from trout red cells (TETENS, LYKKEBOE and CHRISTENSEN) **134**, 267
—Effect on carp red blood cells (FUCHS and ALBERS) **137**, 457
Adrenergic response:
Of carp red cells (SALAMA and NIKINMAA) **136**, 405
Adrenocorticotropic hormone:
Facilitation of release (LEONG) **139**, 151
Aerobic metabolism:
In hopping toads (WALTON and ANDERSON) **136**, 273
***Aglantha digitale*:**
Hair cell mechanoreception (ARKETT, MACKIE and MEECH) **135**, 329
Air sacs:
In bird lungs, air pressure in (KUETHE) **136**, 1
Albino:
Axolotl, light-sensitivity of iris (BARR) **137**, 589
Allometry:
Of running performance in a lizard (MARSH) **137**, 119
***Ambystoma mexicanum*:**
Functional design of feeding mechanism (LAUDER and REILLY) **134**, 219
—Hypersensitivity to light of the iris of the albino (BARR) **137**, 589
***Ambystoma tigrinum*:**
Blood flow patterns during metamorphosis (MALVIN and HEISLER) **137**, 53
Amino acids:
Fluxes of, in a mussel (RICE and STEPHENS) **135**, 275
—Distribution to tissue in *Glycera* (QAFAITI and STEPHENS) **136**, 177
—Transport in locust rectum (MEREDITH and PHILLIPS) **137**, 341
—Metabolism in eel intestine (ANDO) **138**, 93
—Sequence of human synexin (POLLARD, BURNS and ROJAS) **139**, 267

Ammonia:
Excretion of, by *Bufo marinus* during hypercapnia (Boutilier and Heisler) **134**, 79
—Excretion of, by erythrocytes, in trout following acute acidosis (Tang, Nolan and Boutilier) **134**, 297
—In trout red cells and plasma (Wright, Wood and Randall) **134**, 423
—Effect of exercise on distribution in sole (Wright, Randall and Wood) **136**, 149
—Excretion of, by trout (Wood) **136**, 461
—Levels in dogfish uterus (Kormanik) **137**, 443
—Transport across dogfish gill (Evans and More) **138**, 375
—Effect on acid–base balance in a marine teleost (Claiborne and Evans) **140**, 89
Amputation:
Of a leg, motor activity in the stump (Delcomyn) **140**, 465
Analysis:
Of gases in mixed samples (Kozacik) **135**, 499
Anatomy:
Of unpaired neurones in a lepidopteran larva (Brookes and Weevers) **136**, 311
Angiotensin converting enzyme:
In brush-border membranes of bird small intestine (Stevens, Fernandez and Martinez del Rio) **135**, 1
Anhydrobiosis:
In *Artemia* cysts (Glasheen and Hand) **135**, 363
Anion channel:
In teleost intestine (Loretz and Fourtner) **136**, 383
***Anodonta cygnea*:**
Electrophysiology of the mantle (Coimbra, Machado, Fernandes, Ferreira and Ferreira) **140**, 65
Anoxia:
Delayed effect on a cockroach motoneurone (Pitman) **135**, 95
Ant:
Discontinuous emission of CO_2 in *Camponotus vicinus* (Lighton) **134**, 363
Antarctic fish:
Freezing avoidance in (Ahlgren, Cheng, Schrag and DeVries) **137**, 549
Antennal heart:
Of the cockroach, role of octopamine in (Pass, Sperk, Agricola, Baumann and Penzlin) **135**, 495
***Antheraea pernyi*:**
Unpaired median neurones in the larva (Brookes and Weevers) **136**, 311; (Brookes) **136**, 333
Antifreeze:
Glycopeptides in blood of antarctic fish (Ahlgren, Cheng, Schrag and DeVries) **137**, 549
Aphid:
Adhesive organ of *Megoura viciae* (Lees and Hardie) **136**, 209
***Aplysia californica*:**
Learning in a semi-intact preparation (Colebrook and Lukowiak) **135**, 411
—Neurone efficacy in gill withdrawal movements (Lukowiak and Colebrook) **140**, 273
Arctic caterpillar:
Behavioural regulation of (Kukal, Heinrich and Duman) **138**, 181
***Artemia*:**
Anhydrobiosis in cysts (Glasheen and Hand) **135**, 363
Association state:
Of haemocyanin, effect of freezing (Morris) **138**, 535
Astrocytes:
Role in the control of secretion (Hatton) **139**, 67
ATPase:
In an isopod gill (Holliday) **136**, 259
***Austropotamobius pallipes*:**
Acid–base status during exercise (Tyler-Jones and Taylor) **134**, 409
Autonomic nervous system:
In control of cardiac performance in cod (Axelsson) **137**, 287

Basolateral membrane vesicles:
Transport of glucose (Reshkin, Cassano, Womersley and Ahearn) **140**, 123
Behaviour:
Formation flight by pelicans (Hainsworth) **135**, 431
—Of *Nautilus* in response to pressure changes (Jordan, Chamberlain and Chamberlain) **137**, 175
—Of the leech during ingestion (Lent, Fliegner, Freedman and Dickinson) **137**, 513

—Of *Xenopus* at different depths, respiration (SHANNON and KRAMER) **137**, 597
—Head-bobbing in the piegon (DAVIES and GREEN) **138**, 71
—Thermoregulation by an arctic caterpillar (KUKAL, HEINRICH and DUMAN) **138**, 181
—Of flying butterflies (BETTS and WOOTTON) **138**, 271
—Measurement of insect movements (MIALL and HEREWARD) **138**, 541
***Beroe ovata*:**
Ionic dependence of action potentials in smooth muscle cells (BILBAUT, MEECH and HERNANDEZ-NICAISE) **135**, 343
Bioenergetics:
Of growth and maintenance in toads (JØRGENSEN) **138**, 319
Biogenic magnetite:
In sockeye salmon (MANN, SPARKS, WALKER and KIRSCHVINK) **140**, 35; (WALKER, QUINN, KIRSCHVINK and GROOT) **140**, 51
Bioluminescence:
Induction of capability in *Porichthys notatus* (THOMPSON, TOYA, NAFKPAKITIS, GOTO and TSUJI) **137**, 39
Biomechanics:
Of avian respiration (KUETHE) **136**, 1
—Of dragonfly flight (AZUMA and WATANABE) **137**, 221
Biomineralization:
In sockeye salmon (MANN, SPARKS, WALKER and KIRSCHVINK) **140**, 35
Birds:
Angiotensin converting enzyme in grackle small intestine (STEVENS, FERNANDEZ and MARTINEZ DEL RIO) **135**, 1
—Estimation of body drag (PENNYCUICK, OBRECHT and FULLER) **135**, 253
—Effect of radiotransmitters on body drag (OBRECHT, PENNYCUICK and FULLER) **135**, 265
—Air flow in lungs (KUETHE) **136**, 1
***Birgus latro*:**
Adaptation to a terrestrial existence (MORRIS, GREENAWAY and MCMAHON) **140**, 477; (GREENAWAY, MORRIS and MCMAHON) **140**, 493
Blood:
Pressure and flow in the medicinal leech (HILDEBRANDT) **134**, 235
—Pressure, in the toad during exercise (WAHLQVIST and CAMPBELL) **134**, 377
—Flow during swimming in duck (BUTLER, TURNER, AL-WASSIA and BEVAN) **135**, 461
Blood flow:
Changes during metamorphosis in salamanders (MALVIN and HEISLER) **137**, 53
Blood oxygen:
Effect on diving bradycardia in cormorants (JONES and LARIGAKIS) **136**, 499
Body drag:
Estimation of, in large birds (PENNYCUICK, OBRECHT and FULLER) **135**, 253
—Effect of radiotransmitters (OBRECHT, PENNYCUICK and FULLER) **135**, 265
Body mass:
Importance in insect flight (BYRNE, BUCHMANN and SPANGLER) **135**, 9
***Bombyx mori*:**
Secretory potential and ion transport in silk glands (NAKAGAKI and SASAKI) **134**, 155
Bone:
Role in kangaroo rat locomotion (BIEWENER and BLICKHAN) **140**, 243
Bradycardia:
In turtles (HSIEH, PAN, KUO and CHAI) **140**, 405
Branchial shunting:
In rainbow trout (ISHIMATSU, IWAMA and HEISLER) **137**, 75
Branching:
Of unpaired lepidopteran neurones (BROOKES and WEEVERS) **136**, 311
***Branchiura sowerbyi*:**
Tail withdrawal reflex (ZORAN and DREWES) **137**, 487
Brush-border membrane vesicles:
From bird small intestine, activity of angiotensin converting enzyme (STEVENS, FERNANDEZ and MARTINEZ DEL RIO) **135**, 1
—From tilapia intestine, transport of Na^+ and Cl^- (HOWARD and AHEARN) **135**, 65
—From tilapia intestine, transport of fatty acids (TITUS and AHEARN) **135**, 77
—Electroneutral transport of leucine (AHEARN and CLAY) **136**, 363
—Transport of inositol (SIU and AHEARN) **140**, 107
—Transport of glucose (RESHKIN, CASSANO, WOMERSLEY and AHEARN) **140**, 123

***Bufo marinus*:**
Acid–base regulation during hypercapnia (BOUTILIER and HEISLER) **134**, 79
—Effect of exercise on cardiovascular system (WAHLQVIST and CAMPBELL) **134**, 377
***Busycon canaliculatum*:**
Performance of the heart (JONES) **140**, 257
Buoyancy:
Mechanism of, in a deep-sea crustacean (SANDERS and CHILDRESS) **138**, 333
Burrowing:
Nervous control of, in a sea anemone (PICKENS) **135**, 133
Butterflies:
Wing shape and flight behaviour (BETTS and WOOTTON) **138**, 271

Calcium:
Effect on sea anemone nematocysts (HIDAKA and MARISCAL) **136**, 23
—In acid-stressed fish (FREDA and MCDONALD) **136**, 243
—Role in electrophysiology of leech salivary gland cells (WUTTKE and BERRY) **138**, 431
—Requirement for secretory exocytosis (RINK and KNIGHT) **139**, 1
—Mechanism of intracellular translocation (GILL, MULLANEY and GHOSH) **139**, 105
—Metabolism in secretory cells (PUTNEY) **139**, 135
—The Ins(1,4,5)P_3-sensitive store in non-muscle cells (POZZAN, VOLPE, ZORZATO, BRAVIN, KRAUSE, LEW, HASHIMOTO, BRUNO and MELDOLESI) **139**, 181
—Fluxes across teleost intestinal mucosa (SUNDELL and BJÖRNSSON) **140**, 171
—Hormonal control of, in eels (LAFEBER, HANSSEN and WENDELAAR-BONGA) **140**, 199
—Sensitivity to, of fish hearts (DRIEDZIC and GESSER) **140**, 227
—Effect on squid giant synapse (ADAMS and GILLESPIE) **140**, 535
Calcium channels:
In cells of the mouse neurohypophysis (SALZBERG and OBAID) **139**, 195
—Role in fusion of secretory vesicles (POLLARD, BURNS and ROJAS) **139**, 267
—In excitable and non-excitable cells (PENNER and NEHER) **139**, 329
Calcium transients:
In the somatotrope (THORNER, HOLL and LEONG) **139**, 169
***Calliactis tricolor*:**
Effect of ions on nematocysts (HIDAKA and MARISCAL) **136**, 23
***Calliphora erythrocephala*:**
Muscle membrane electrogenesis (DAWSON and DJAMGOZ) **136**, 417; (DJAMGOZ and DAWSON) **136**, 433
Calorimetry:
Indirect, for measurement of heat production (VAN WAVERSVELD, ADDINK, VAN DEN THILLART and SMIT) **138**, 529
Calsequestrin:
Location in 'calciosomes' (POZZAN, VOLPE, ZORZATO, BRAVIN, KRAUSE, LEW, HASHIMOTO, BRUNO and MELDOLESI) **139**, 181
Campaniform sensilla:
Role in stick insect walking (BÄSSLER) **136**, 125
***Camponotus vicinus*:**
Discontinuous emission of CO_2 (LIGHTON) **134**, 363
***Cancer borealis*:**
Neuromodulation of pyloric rhythm (NUSBAUM and MARDER) **135**, 165
Carbohydrate metabolism:
Arrest of, during anhydrobiosis in *Artemia* cysts (GLASHEEN and HAND) **135**, 363
Carbon dioxide:
Discontinuous emission in an ant (LIGHTON) **134**, 363
—High blood levels in trout (DIMBERG) **134**, 463
—Analysis of, in mixed gas samples (KOZACIK) **135**, 499
—Stores in reptiles (STINNER and WARDLE) **137**, 529
Carbonic anhydrase:
In the channel catfish (HENRY, SMATRESK and CAMERON) **134**, 201
***Carcinus maenas*:**
Mechanical power output of scaphognathite (STOKES and JOSEPHSON) **140**, 287
Cardiac output:
Of horses in response to exercise (EVANS and ROSE) **134**, 397
—Partitioning of, in rainbow trout (ISHIMATSU, IWAMA and HEISLER) **137**, 75
Cardiac performance:
Control in exercising cod (AXELSSON) **137**, 287
—Of squid (WELLS, HANLON, LEE and DIMARCO) **138**, 17

—*Busycon canaliculatum* (JONES) **140**, 257

Catecholamines:
Effect on proton extrusion from trout red cells (TETENS, LYKKEBOE and CHRISTENSEN) **134**, 267

—Role in acid–base regulation in acidotic trout (TANG, NOLAN and BOUTILIER) **134**, 297

—Levels in the toad during exercise (WAHLQVIST and CAMPBELL) **134**, 377

—Effect on trout erythrocytes (TUFTS, FERGUSON and BOUTILIER) **140**, 301

—Effect on dogfish heart (VAN VLIET, METCALFE, BUTLER and WEST) **140**, 549

***Cavolinia inflexa*:**
Swimming, non-spiking interneurones in the pedal ganglia (SPENCER) **134**, 443

Cell-associated water:
In *Artemia* cysts (GLASHEEN and HAND) **135**, 363

Cell fusion:
In a heliozoan (NISHI, GOTOW and KOBAYASHI) **135**, 183

Cell volume:
Regulation of, in trout hepatocytes (BIANCHINI, FOSSAT, PORTHÉ-NIBELLE, ELLORY and LAHLOU) **137**, 303

—Effect of stress on carp erythrocytes (FUCHS and ALBERS) **137**, 457

Central pattern generator:
In *Lymnaea stagnalis*, modulation by serotonin (TUERSLEY and MCCROHAN) **135**, 473

—Control of, in Crustacea (DICKINSON, NAGY and MOULINS) **136**, 53

Cercus:
Control of position in the flying cockroach (LIBERSAT and CAMHI) **136**, 483

Channel block:
By chlorisondamine, in locust muscle (ASHFORD, BODEN, RAMSEY, SANSOM, SHINOZAKI and USHERWOOD) **134**, 131

Chemoreception:
In cormorants (JONES and LARIGAKIS) **136**, 499

Chemoreceptors:
In the locust, effect of diet on their sensitivity (ABISGOLD and SIMPSON) **135**, 215

***Chlorella*:**
A symbiont of *Paramecium*, effect on its behavioural responses to light (IWATSUKI and NAITOH) **134**, 43

Chlorisondamine:
Blocks locust muscle glutamate receptors (ASHFORD, BODEN, RAMSEY, SANSOM, SHINOZAKI and USHERWOOD) **134**, 131

Chordotonal organ:
Role in stick insect walking (BÄSSLER) **136**, 125

Chromaffin cells:
Exocytosis in (AUNIS and BADER) **139**, 253

—Stimulus–secretion coupling in (PENNER and NEHER) **139**, 329

Chromatophores:
Motor fields of, in squid (FERGUSON, MARTINI and PINSKER) **134**, 281

Chum salmon:
Motility of sperm (MORISAWA and MORISAWA) **136**, 1

Ciliary reversal:
In swimming *Paramecium* (ROBERTS and AL-RUDAINY) **138**, 517

Circulation:
In the medicinal leech (HILDEBRANDT) **134**, 235

—In the toad during exercise (WAHLQVIST and CAMPBELL) **134**, 377

***Columba livia*:**
Kinematics of flight (DIAL, KAPLAN, GOSLOW and JENKINS) **134**, 1

Compartmentalization:
In muscle of the barred sand bass (ROBERTS, LOWERY and SOMERO) **137**, 13

Compliance:
Of crocodile lungs (PERRY) **134**, 99

Conditioning:
Of the gill withdrawal reflex in *Aplysia* (COLEBROOK and LUKOWIAK) **135**, 411

Contractile properties:
Of teleost myotomal muscle (ALTRINGHAM and JOHNSTON) **140**, 313

Copepods:
Functions of eye and body movements (LAND) **140**, 381

Cormorants:
Diving bradycardia in (JONES and LARIGAKIS) **136**, 499

Corpuscles of Stannius:
Role in control of hypocalcaemia in eels (LAFEBER, HANSSEN and WENDELAAR-BONGA) **140**, 199

Corticotropin releasing hormone:
Role in modulation of ACTH release (LEONG) **139**, 151

Cotransport:
Of ions in lobster BBMV (AHEARN and CLAY) **136**, 363
—Of sugars, by lobster BBMV (SIU and AHEARN) **140**, 107
Crab:
Neuromodulation of the pyloric rhythm (NUSBAUM and MARDER) **135**, 165
—*Birgus latro*, adaptation to a terrestrial existence (MORRIS, GREENAWAY and MCMAHON) **140**, 477; (GREENAWAY, MORRIS and MCMAHON) **140**, 493
Crayfish:
Acid–base status during aerial exposure (TYLER-JONES and TAYLOR) **134**, 409
—Compensation for extracellular pH (BURTIN and MASSABUAU) **137**, 411
—Coupled motor neurones (SKORUPSKI and SILLAR) **140**, 355
Crocodile:
Functional morphology of the lungs of *Crocodylus niloticus* (PERRY) **134**, 99
Crustaceans:
Phylogenetic plasticity of stomatogastric circuits (MEYRAND and MOULINS) **138**, 107, 133
—Ocular tracking of moving targets (CRONIN, NAIR, DOYLE and CALDWELL) **138**, 155
—Buoyancy of *Notostomus gibbosus* (SANDERS and CHILDRESS) **138**, 333
—Escape response of hermit crab (FRASER and HEITLER) **140**, 209
Ctenophora:
Action potentials of smooth muscle cells of *Beroe ovata* (BILBAUT, MEECH and HERNANDEZ-NICAISE) **135**, 343
Culture:
Of leech nociceptive cells (VYKLICKY and NICHOLLS) **134**, 17
—Of embryonic cockroach neurones, ionic currents (CHRISTENSEN, LARMET, SHIMAHARA, BEADLE and PICHON) **135**, 193
***Cyprinus carpio*:**
Adrenergic responses of red cells (SALAMA and NIKINMAA) **136**, 405
Cysts:
Of *Artemia*, anhydrobiosis of (GLASHEEN and HAND) **135**, 363
Cytoskeleton:
As a barrier to exocytosis (AUNIS and BADER) **139**, 253

Damping coefficients:
Of frog skin membrane potential (BAPTISTA, RAMOS and DE JESUS) **135**, 51
Desensitization:
Of the squid giant synapse (ADAMS and GILLESPIE) **140**, 535
Desiccation:
Effect on cockroach water loss (NOBLE-NESBITT and AL-SHUKUR) **136**, 451; **137**, 107
Diet:
Effect on chemoreceptor sensitivity in the locust (ABISGOLD and SIMPSON) **135**, 215
***Dipsosaurus dorsalis*:**
Ontogenesis of muscle contractile properties (MARSH) **137**, 119
Diptera:
Mechanism of flight (MIYAN and EWING) **136**, 229
Distance:
Visual discrimination of, by octopuses (MUNTZ and GWYTHER) **140**, 345
Distribution:
Of absorbed amino acids in *Glycera* (QAFAITI and STEPHENS) **136**, 177
Diving:
Effect on cardiovascular system of mink (STEPHENSON, BUTLER, DUNSTONE and WOAKES) **134**, 435
—In cormorants (JONES and LARIGAKIS) **136**, 499
—Effect on respiratory behaviour in *Xenopus* (SHANNON and KRAMER) **137**, 597
—Of tufted ducklings, cardiac response (KEIJER, BUTLER and WOAKES) **138**, 195
Dogfish:
Uterine conditions in (KORMANIK) **137**, 443
—Ammonia transport across the gill (EVANS and MORE) **138**, 375
—Muscle contraction (CURTIN and WOLEDGE) **140**, 187
—Effect of catecholamines on the heart (VAN VLIET, METCALFE, BUTLER and WEST) **140**, 549
Dormancy:
In snails (BARNHART and MCMAHON) **138**, 289
Drag:
On swimming seals (FISH, INNES and RONALD) **137**, 157
—On swimming frogs (GAL and BLAKE) **138**, 399
Dragonfly:
Flight performance (AZUMA and WATANABE) **137**, 221

Drinking:
Of fish larvae (TYTLER and BLAXTER) **138**, 1
***Drosophila melanogaster*:**
Landing response (WITTEKIND) **135**, 491
Duck:
Aerobic capacity of locomotory muscle (TURNER and BUTLER) **135**, 445
—Blood flow distribution during swimming (BUTLER, TURNER, AL-WASSIA and BEVAN) **135**, 461
Ducklings:
Cardiac response to (KEIJER, BUTLER and WOAKES) **138**, 195

Eel:
Solubility of inert gases in blood (PELSTER, KOBAYASHI and SCHEID) **135**, 243
—Amino acid metabolism and water transport across the intestine (ANDO) **138**, 93
—Effect of hypocalcin on (LAFEBER, HANSSEN and WENDELAAR-BONGA) **140**, 199
Electrical connections:
Made by leech nociceptive cells in culture (VYKLICKY and NICHOLLS) **134**, 17
—During cell fusion in a helizoan (NISHI, GOTOW and KOBAYASHI) **135**, 183
—In the leech central nervous system (ACKLIN) **137**, 1
Electric field:
Causes ciliary reversal in *Paramecium* (ROBERTS and AL-RUDAINY) **138**, 517
Electromyography:
Of pigeon flight muscles (DIAL, KAPLAN, GOSLOW and JENKINS) **134**, 1
—Of moving snakes (JAYNE) **140**, 1
Electrophysiology:
Of the mantle of *Anodonta cygnea* (COIMBRA, MACHADO, FERNANDES, FERREIRA and FERREIRA) **140**, 65
—Of nerve–muscle preparation from sculpin (ALTRINGHAM and JOHNSTON) **140**, 313
***Eledone cirrosa*:**
Vibration sensitivity in the statocyst (WILLIAMSON) **134**, 451
Emersion:
Effect on mussel acid–base regulation (HEMING, VINOGRADOV, KLERMAN and KOMOV) **137**, 501
Endoplasmic reticulum:
Role in intracellular calcium translocation (GILL, MULLANEY and GHOSH) **139**, 105
—Distinction from 'calciosomes' (POZZAN, VOLPE, ZORZATO, BRAVIN, KRAUSE, LEW, HASHIMOTO, BRUNO and MELDOLESI) **139**, 181
Energetics:
Of jet propulsion in a jellyfish (DEMONT and GOSLINE) **134**, 333
—Of formation flight in brown pelicans (HAINSWORTH) **135**, 431
—Of hopping in toads (WALTON and ANDERSON) **136**, 273
—Of quadruped locomotion (HEGLUND and TAYLOR) **138**, 301
—Of locomotion in salamanders (FULL, ANDERSON, FINNERTY and FEDER) **138**, 471; (FEDER) **138**, 487
Enzyme activity:
Preservation of, in fish intestinal BBMV (RESHKIN, CASSANO, WOMERSLEY and AHEARN) **140**, 123
Epidermis:
Uptake of amino acids in *Glycera* (QAFAITI and STEPHENS) **136**, 177
Epithelium:
Ultrastructure of, in crocodile lungs (PERRY) **134**, 99
Erythrocytes:
Inhibition of carbonic anhydrase, effects in channel catfish (HENRY, SMATRESK and CAMERON) **134**, 201
—Effect of catecholamines on proton extrusion in trout (TETENS, LYKKEBOE and CHRISTENSEN) **134**, 267
—Acid–base regulation, in acidotic trout (TANG, NOLAN and BOUTILIER) **134**, 297
—Ammonia levels in trout (WRIGHT, WOOD and RANDALL) **134**, 423
—Of carp, adrenergic responses (SALAMA and NIKINMAA) **136**, 405
—Effects of stress in carp (FUCHS and ALBERS) **137**, 457
—Effects of catecholamines in trout (TUFTS, FERGUSON and BOUTILIER) **140**, 301
Escape response:
Of a tubificid worm (ZORAN and DREWES) **137**, 487
—Of the hermit crab (FRASER and HEITLER) **140**, 209
Ethmoid tissue:
In sockeye salmon, site of single-domain magnetite (WALKER, QUINN, KIRSCHVINK and GROOT) **140**, 51
***Euphausia*:**
Eye/photophore coordination (GRINNELL, NARINS, AWBREY, HAMNER and HAMNER) **134**, 61

Excretion:
By the leech (LENT, FLIEGNER, FREEDMAN and DICKINSON) **137**, 513
Exercise:
Effects on cardiovascular system of a toad (WAHLQVIST and CAMPBELL) **134**, 377
—Cardiovascular and respiratory responses of horses (EVANS and ROSE) **134**, 397
—Effect on lactate levels in fish (MILLIGAN and MCDONALD) **135**, 119
—Performance in duck (TURNER and BUTLER) **135**, 445
—Effect of ammonia distribution in sole (WRIGHT, RANDALL and WOOD) **136**, 149
—Effect on cardiac performance in cod (AXELSSON) **137**, 287
—Effect on ion fluxes in trout erythrocytes (TUFTS, FERGUSON and BOUTILIER) **140**, 301
Exocytosis:
Mechanisms of (RINK and KNIGHT) **139**, 1
—Morphometry of, using tannic acid (MORRIS and POW) **139**, 81
—The cytoskeleton as a barrier to (AUNIS and BADER) **139**, 253
—In anterior pituitary cells (MASON, RAWLINGS, COBBETT, SIKDAR, ZOREC, AKERMAN, BENHAM, BERRIDGE, CHEEK and MORETON) **139**, 287
Eye movement:
In prey capture by *Polyphemus* (YOUNG) **137**, 399
—In copepods (LAND) **140**, 381

Facilitation:
Of peptide release in the neurohypophysis (BICKNELL) **139**, 51
—In pituitary ACTH cells (LEONG) **139**, 151
Fatigue:
In the secretory process (BICKNELL) **139**, 51
Fatty acids:
Transport across tilapia intestine (TITUS and AHEARN) **135**, 77
Feeding:
Functional design of mechanism in salamanders (LAUDER and REILLY) **134**, 219
—Effect of diet on chemoreceptor sensitivity in the locust (ABISGOLD and SIMPSON) **135**, 215
—Modulation of patterned motor output in *Lymnaea* (TUERSLEY and MCCROHAN) **135**, 473
—Radula kinetics in *Helisoma trivolvis* (SMITH) **136**, 89
—Coordination of, in the pond snail (KYRIAKIDES and MCCROHAN) **136**, 103
Filtration methods:
To evaluate condition of fish red blood cells (HUGHES and ALBERS) **138**, 523
Fish:
NaCl transport in tilapia intestine (HOWARD and AHEARN) **135**, 65
—Fatty acid transport in tilapia intestine (TITUS and AHEARN) **135**, 77
—Oxygen extraction in myoglobin-rich hearts (BAILEY and DRIEDZIC) **135**, 301
—Drinking rates of larvae (TYTLER and BLAXTER) **138**, 1
—Evaluation of condition of red blood cells (HUGHES and ALBERS) **138**, 523
—Differences between hearts of teleosts and elasmobranchs (DRIEDZIC and GESSER) **140**, 227
Flight:
Kinematics of pigeon flight (DIAL, KAPLAN, GOSLOW and JENKINS) **134**, 1
—Indoor experiments with trained kestrels (VIDELER, VOSSEBELT, GNODDE and GROENEWEGEN) **134**, 173; (VIDELER, GROENEWEGEN, GNODDE and VOSSEBELT) **134**, 185
—Role of motor neurones in locust steering behaviour (BAADER) **134**, 455
—Wing loading, wingbeat frequency and body mass in insects (BYRNE, BUCHMANN and SPANGLER) **135**, 9
—Effect of temperature on insect flight muscle potentials (ESCH) **135**, 109
—Estimates of body drag (PENNYCUICK, OBRECHT and FULLER) **135**, 253
—Effect of radiotransmitters on body drag (OBRECHT, PENNYCUICK and FULLER) **135**, 265
—Role of hindwing tegulae in locusts (PEARSON and WOLF) **135**, 381
—Drag savings from ground effect (HAINSWORTH) **135**, 431
—Landing response in *Drosophila* (WITTEKIND) **135**, 491
—Of pigeons, temperature regulation (MARTINEAU and LAROCHELLE) **136**, 193
—Mechanism of, in Diptera (MIYAN and EWING) **136**, 229
—Control of cercal position in the cockroach (LIBERSAT and CAMHI) **136**, 483

—Behavioural changes in moths responding to pheromones (Baker and Vogt) **137**, 29
—Performance of a dragonfly (Azuma and Watanabe) **137**, 221
—Of butterflies (Betts and Wootton) **138**, 271
—Torsion in insect wings (Ennos) **140**, 137
—Wing rotation in Diptera (Ennos) **140**, 161
—Gliding of African vultures (Tucker) **140**, 325
—Sensory convergence in locusts (Hensler) **140**, 511

Flight muscle:
Modulatory actions of octopamine in locusts (Whim and Evans) **134**, 247

Flight paths:
Monitoring of (Bramanti, dall'Antonia and Papi) **134**, 467

Fluid transport:
In insect Malpighian tubules (Maddrell and Overton) **137**, 265

Foetus:
Oxygen affinity of snake red blood cells (Berner and Ingermann) **140**, 437

Force:
Of kangaroo rat muscles (Biewener, Blickhan, Perry, Heglund and Taylor) **137**, 191
—Acting on swimming squid (O'Dor) **137**, 421
—Of dogfish muscle (Curtin and Woledge) **140**, 187
—Produced by teleost and elasmobranch hearts (Driedzic and Gesser) **140**, 227

Freezing:
Avoidance of, in antarctic fish (Ahlgren, Cheng, Schrag and DeVries) **137**, 549
—Effect on haemocyanin (Morris) **138**, 535

Frog:
Rana ridibunda, effects of lithium on skin membrane potential (Baptista, Ramos and de Jesus) **135**, 51
—*Rana catesbeiana*, regeneration of visual pigments (Azuma and Azuma) **135**, 317
—Biomechanics of swimming (Gal and Blake) **138**, 399, 413

Fur:
Significance of structure for solar heat gain in a squirrel (Walsberg) **138**, 243

Fura-2:
Used to measure cytosolic free calcium concentration (Leong) **139**, 151; (Thorner, Holl and Leong) **139**, 169

Fusion:
In a heliozoan (Nishi, Gotow and Kobayashi) **135**, 183
—Of secretory vesicles (Pollard, Burns and Rojas) **139**, 267

***Gadus morhua*:**
Control of cardiac performance (Axelsson) **137**, 287
—Calcium fluxes across intestinal mucosa (Sundell and Björnsson) **140**, 171

Gait:
Preferred speed in terrestrial vertebrates (Perry, Blickhan, Biewener, Heglund and Taylor) **137**, 207
—Relationship to speed, stride frequency and energy cost (Heglund and Taylor) **138**, 301

***Gallus domesticus*:**
Transintestinal potassium transport (Grubb, Brown and Bentley) **135**, 487

Gases:
Analysis of, in mixed samples (Kozacik) **135**, 499

Gas exchange:
During diving in mink (Stephenson, Butler, Dunstone and Woakes) **134**, 435
—Cutaneous, in exercising salamanders (Feder) **138**, 487
—In a landcrab (Morris, Greenaway and McMahon) **140**, 477; (Greenaway, Morris and McMahon) **140**, 493

Gastropod:
Radula kinetics in *Helisoma trivolvis* (Smith) **136**, 89

Geotaxis:
In sea urchin larvae (Mogami, Oobayashi, Yamaguchi, Ogiso and Baba) **137**, 141

Giant fibres:
Role in tail withdrawal reflex of a worm (Zoran and Drewes) **137**, 487
—Inhibition of, in the hermit crab escape response (Fraser and Heitler) **140**, 209

Giant synapse:
Actions of L-glutamate in the squid (Adams and Gillespie) **140**, 535

Gill:
In channel catfish, distribution of carbonic anhydrase (HENRY, SMATRESK and CAMERON) **134**, 201
—Withdrawal reflex in *Aplysia* (COLEBROOK and LUKOWIAK) **135**, 411
—Role in osmoregulation in an isopod (HOLLIDAY) **136**, 259
—Acid–base and ionic exchanges in exercised trout (WOOD) **136**, 461
—Partitioning of blood flow in rainbow trout (ISHIMATSU, IWAMA and HEISLER) **137**, 75
—Transport of ammonia, in dogfish (EVANS and MORE) **138**, 375
—Role in acid–base regulation in a marine teleost (CLAIBORNE and EVANS) **140**, 89
—Withdrawal of, in *Aplysia* (LUKOWIAK and COLEBROOK) **140**, 273
***Gillichthys mirabilis*:**
Characterization of an intestinal anion channel (LORETZ and FOURTNER) **136**, 383
Glia:
Interactions with neurones, role in secretion (HATTON) **139**, 67
Gliding:
Of African vultures (TUCKER) **140**, 325
Glucose:
Transport of, in fish intestine (RESHKIN, CASSANO, WOMERSLEY and AHEARN) **140**, 123
Glutamate:
Ion-selectivity of channels, in locust muscle (KITS and USHERWOOD) **138**, 499
—Actions of squid giant synapse (ADAMS and GILLESPIE) **140**, 535
Glutamate receptors:
Blocking by chlorisondamine, in locust muscle (ASHFORD, BODEN, RAMSEY, SANSOM, SHINOZAKI and USHERWOOD) **134**, 131
Glutamine:
Transport across the eel intestine (ANDO) **138**, 93
***Glycera dibranchiata*:**
Epidermal uptake and distribution of amino acids (QAFAITI and STEPHENS) **136**, 177
Glycolysis:
In control of photophore luminescence (REES and BAGUET) **135**, 289
Glycopeptides:
In blood of antarctic fish (AHLGREN, CHENG, SCHRAG and DEVRIES) **137**, 549
Goldfish:
Posture during vestibular compensation (OTT and PLATT) **138**, 345, 359
Grasshopper:
Effect of temperature on acid–base status (HARRISON) **140**, 421
Ground effect:
Induced drag savings during formation flight (HAINSWORTH) **135**, 431
Growth:
Metabolic costs of, in toads (JØRGENSEN) **138**, 319
Growth hormone releasing hormone:
Effects on somatotropes (THORNER, HOLL and LEONG) **139**, 169
GTP:
Role in intracellular translocation of calcium (GILL, MULLANEY and GHOSH) **139**, 105
***Gynaephora groenlandica*:**
Behavioural thermoregulation of (KUKAL, HEINRICH and DUMAN) **138**, 181
***Gyps africanus*:**
Gliding performance (TUCKER) **140**, 325

Haemocyanin:
Effect of freezing on structure and function (MORRIS) **138**, 535
—Of a landcrab (MORRIS, GREENAWAY and MCMAHON) **140**, 477; (GREENAWAY, MORRIS and MCMAHON) **140**, 493
Haemolymph:
Acid–base status of, in crayfish exposed to air (TYLER-JONES and TAYLOR) **134**, 409
Hair cells:
Of jellyfish, mechanoreception by (ARKETT, MACKIE and MEECH) **135**, 329
Hard water:
High blood CO_2 levels in trout (DIMBERG) **134**, 463
Head-bobbing:
In the pigeon (DAVIES and GREEN) **138**, 71
Heart:
In fish, protein synthesis in response to exercise (HOULIHAN, AGNISOLA, LYNDON, GRAY and HAMILTON) **137**, 565
—In fish, calcium-sensitivity of (DRIEDZIC and GESSER) **140**, 227
—Rate and mass in *Busycon canaliculatum* (JONES) **140**, 257
—Effect of catecholamines in dogfish (VAN VLIET, METCALFE, BUTLER and WEST) **140**, 549

Heart rate:
Autonomic influences on, in the toad (WAHLQVIST and CAMPBELL) **134**, 377
—In diving mink (STEPHENSON, BUTLER, DUNSTONE and WOAKES) **134**, 435
—Of invertebrates, measurement of (BUCHAN, PECK and TUBLITZ) **136**, 495
—Of diving ducklings (KEIJER, BUTLER and WOAKES) **138**, 195
Heat gain:
From the sun, role of fur structure (WALSBERG) **138**, 243
Heat production:
Measurement of (VAN WAVERSVELD, ADDINK, VAN DEN THILLART and SMIT) **138**, 529
Heliozoan:
Cell fusion in *Echinosphaerium akamae* (NISHI, GOTOW and KOBAYASHI) **135**, 183
Hepatocytes:
From trout, effect of acid–base status on metabolism (WALSH, MOMMSEN, MOON and PERRY) **135**, 231
Hermit crab:
Escape response of (FRASER and HEITLER) **140**, 209
***Hirudo medicinalis*:**
Specificity of connections formed by cultured nociceptive cells (VYKLICKY and NICHOLLS) **134**, 17
—Circulation in (HILDEBRANDT) **134**, 235
Histamine:
The neurotransmitter in the locust ocellar photoreceptors (SIMMONS and HARDIE) **138**, 205
—Receptors for, in fly visual system (HARDIE) **138**, 221
Homeostasis:
In lepidopteran midgut (DOW and HARVEY) **140**, 455
Homing:
Of magnetized and demagnetized pigeons (WALCOTT, GOULD and LEDNOR) **134**, 27
—Monitoring of pigeons' flight paths (BRAMANTI, DALL'ANTONIA and PAPI) **134**, 467
Honeybees:
Effect of temperature on flight muscle potentials (ESCH) **135**, 109
Horse:
Cardiovascular and respiratory responses to exercise (EVANS and ROSE) **134**, 397
—Changes in ion levels in sweat (WILSON, ELDER, JENKINSON and MCWILLIAMS) **136**, 489
—Mitochondrial distribution in muscle (KAYAR, HOPPELER, ESSEN-GUSTAVSSON and SCHWERZMANN) **137**, 253
Hypercapnia:
Effect on acid–base regulation in *Bufo marinus* (BOUTILIER and HEISLER) **134**, 79
—High blood CO_2 levels in trout in hard water (DIMBERG) **134**, 463
—Effect on trout hepatocytes (WALSH, MOMMSEN, MOON and PERRY) **135**, 231
—In sole, effect on ammonia distribution (WRIGHT, RANDALL and WOOD) **136**, 149
—Effect on metabolism of snails (BARNHART and MCMAHON) **138**, 289
Hypocalcin:
Effect on stanniectomized eels (LAFEBER, HANSSEN and WENDELAAR-BONGA) **140**, 199
Hyposmotic shock:
Effect on trout hepatocytes (BIANCHINI, FOSSAT, PORTHÉ-NIBELLE, ELLORY and LAHLOU) **137**, 303
Hypothalamus:
Signal transduction, mRNA and neurosecretion (LIGHTMAN) **139**, 31
Hypoxia:
Effect on squid respiratory and cardiac performance (WELLS, HANLON, LEE and DIMARCO) **138**, 17

***Ictalurus punctatus*:**
Carbonic anhydrase in the gills and erythrocytes (HENRY, SMATRESK and CAMERON) **134**, 201
Identified neurones:
From a snail, effects of serotonin (FURUKAWA and KOBAYASHI) **137**, 319
—Producing gill withdrawal movements in *Aplysia* (LUKOWIAK and COLEBROOK) **140**, 273
***Idotea*:**
Kinematics of swimming (ALEXANDER) **138**, 37
Impedance:
Converter, to measure invertebrate heartbeat (BUCHAN, PECK and TUBLITZ) **136**, 495
Inert gases:
Solubility in eel blood, effect of pH (PELSTER, KOBAYASHI and SCHEID) **135**, 243
Ingestion:
By the medicinal leech (LENT, FLIEGNER, FREEDMAN and DICKINSON) **137**, 513

Inositol phosphates:
Role in intracellular calcium translocation (GILL, MULLANEY and GHOSH) **139**, 105
—Role in signal transduction in secretory cells (PUTNEY) **139**, 135
Inositol 1,4,5-trisphosphate:
Effects on calcium store in non-muscle cells (POZZAN, VOLPE, ZORZATO, BRAVIN, KRAUSE, LEW, HASHIMOTO, BRUNO and MELDOLESI) **139**, 181
Insects:
Flight of (BYRNE, BUCHMANN and SPANGLER) **135**, 9
—Measurement of movements (MIALL and HEREWARD) **138**, 541
—Wing torsion (ENNOS) **140**, 137
—Wing rotation (ENNOS) **140**, 161
***In situ* hybridization:**
To measure mRNA in the hypothalamus (LIGHTMAN) **139**, 31
Insulation:
Role of fur structure (WALSBERG) **138**, 243
Interneurone:
Non-spiking, in a mollusc pedal ganglion (SPENCER) **134**, 443
Intestine:
Potassium transport in chickens (GRUBB, BROWN and BENTLEY) **135**, 487
—Of teleosts, contain a voltage-gated anion channel (LORETZ and FOURTNER) **136**, 383
Invertebrate:
Measurement of heart rate (BUCHAN, PECK and TUBLITZ) **136**, 495
Ion channels:
In cultured cockroach neurones (CHRISTENSEN, LARMET, SHIMAHARA, BEADLE and PICHON) **135**, 193
—In teleost intestine (LORETZ and FOURTNER) **136**, 383
—In lepidopteran midgut (CRAWFORD and HARVEY) **137**, 277
—In locust muscle, ion-selectivity (KITS and USHERWOOD) **138**, 499
—In *Paramecium* cell membrane (ROBERTS and AL-RUDAINY) **138**, 517
—In anterior pituitary cells (MASON, RAWLINGS, COBBETT, SIKDAR, ZOREC, AKERMAN, BENHAM, BERRIDGE, CHEEK and MORETON) **139**, 287
—In rat pituitary cells (MCBURNEY and KEHL) **139**, 317
Ion fluxes:
In trout hepatocytes (BIANCHINI, FOSSAT, PORTHÉ-NIBELLE, ELLORY and LAHLOU) **137**, 303
—In the gills of a marine teleost (CLAIBORNE and EVANS) **140**, 89
—Across teleost intestinal mucosa (SUNDELL and BJÖRNSSON) **140**, 171
—In trout erythrocytes (TUFTS, FERGUSON and BOUTILIER) **140**, 301
Ionic currents:
In cultured cockroach neurones (CHRISTENSEN, LARMET, SHIMAHARA, BEADLE and PICHON) **135**, 193
—In an identified snail neurone (FURUKAWA and KOBAYASHI) **137**, 319
Ion replacement:
As a buoyancy mechanism in a crustacean (SANDERS and CHILDRESS) **138**, 333
Ion-selective microelectrodes:
Used to study potassium transport in *Manduca sexta* midgut (MOFFETT and KOCH) **135**, 25, 39
—Used to measure membrane electrogenesis in insect muscle (DAWSON and DJAMGOZ) **136**, 417; (DJAMGOZ and DAWSON) **136**, 433
Ion transport:
In the posterior silk glands of *Bombyx mori* (NAKAGAKI and SASAKI) **134**, 155
—In locust ileum (IRVINE, AUDSLEY, LECHLEITNER, MEREDITH, THOMSON and PHILLIPS) **137**, 361

Jellyfish:
Mechanics of jet propulsion (DEMONT and GOSLINE) **134**, 313, 333, 347
—Hair cell mechanoreception in (ARKETT, MACKIE and MEECH) **135**, 329
Jet propulsion:
In squid (O'DOR) **137**, 421
Jump:
In the locust, the role of fast extensor motor activity (HEITLER and BRÄUNIG) **136**, 289

Kestrel:
Effects of added weight on flight (VIDELER, VOSSEBELT, GNODDE and GROENEWEGEN) **134**, 173; (VIDELER, GROENEWEGEN, GNODDE and VOSSEBELT) **134**, 185
Kick:
In the locust, role of fast extensor motor activity (HEITLER and BRÄUNIG) **136**, 289

Kidney:
Acid–base and ionic exchanges in exercised trout (WOOD) **136**, 461
Kinematics:
Of pigeon flight (DIAL, KAPLAN, GOSLOW and JENKINS) **134**, 1
—Of kestrel flight, effect of added weight (VIDELER, GROENEWEGEN, GNODDE and VOSSEBELT) **134**, 185
—Of seal swimming (FISH, INNES and RONALD) **137**, 157
—Of swimming in *Idotea* (ALEXANDER) **138**, 37
—Of fish swimming (WEBB) **138**, 51
—Of butterfly flight (BETTS and WOOTTON) **138**, 271
Krill:
Eye/photophore coordination (GRINNELL, NARINS, AWBREY, HAMNER and HAMNER) **134**, 61

Labyrinth:
Role in vestibular compensation in goldfish (OTT and PLATT) **138**, 345, 359
Lactate:
Kinetics of, in coho salmon and starry flounder (MILLIGAN and MCDONALD) **135**, 119
—Metabolism of, in trout hepatocytes (WALSH, MOMMSEN, MOON and PERRY) **135**, 231
Lamprey:
Acid-tolerance of (MATSOFF and NIKINMAA) **136**, 351
Landing response:
Of tethered flying *Drosophila* (WITTEKIND) **135**, 491
Larvae:
Of sea urchins, negative geotaxis (MOGAMI, OOBAYASHI, YAMAGUCHI, OGISO and BABA) **137**, 141
—Of fish, effect of salinity on drinking rate (TYTLER and BLAXTER) **138**, 1
Laser:
Used to ablate selectively jellyfish hair cells (ARKETT, MACKIE and MEECH) **135**, 329
—Used to study function of nerve terminals (SATTELLE) **139**, 233
Learning:
By a semi-intact *Aplysia* preparation (COLEBROOK and LUKOWIAK) **135**, 411; (LUKOWIAK and COLEBROOK) **140**, 273
Leech:
Specificity of connections formed by cultured nociceptive cells (VYKLICKY and NICHOLLS) **134**, 17
—Circulation in (HILDEBRANDT) **134**, 235
—Doubly rectifying junctions in the central nervous system (ACKLIN) **137**, 1
—Secretion by salivary gland cells (MARSHALL and LENT) **137**, 89
—Ingestive behaviour (LENT, FLIEGNER, FREEDMAN and DICKINSON) **137**, 513
—Electrophysiology of salivary gland cells (WUTTKE and BERRY) **138**, 431
Legs:
Of pigeons, role in temperature regulation (MARTINEAU and LAROCHELLE) **136**, 193
—Coordination of in stick insects (CRUSE and SCHWARZE) **138**, 455
Leucine transport:
In lobster hepatopancreas (AHEARN and CLAY) **136**, 363
Light:
Effect on iris of albino axolotl (BARR) **137**, 589
Light-following:
Eye/photophore coordination in krill (GRINNELL, NARINS, AWBREY, HAMNER and HAMNER) **134**, 61
Light scattering:
Used to study secretion (SALZBERG and OBAID) **139**, 195
—Used to study function of synapses and nerve terminals (SATTELLE) **139**, 233
Lithium:
Effect on membrane potential in frog skin (BAPTISTA, RAMOS and DE JESUS) **135**, 51
Lobster:
Control of central pattern generator (DICKINSON, NAGY and MOULINS) **136**, 53
—Electroneutral ion transport in BBMV (AHEARN and CLAY) **136**, 363
—Hepatopancreatic inositol transport (SIU and AHEARN) **140**, 107
Locomotion:
Mechanics of jet propulsion in a jellyfish (DEMONT and GOSLINE) **134**, 313, 333, 347
—Coordination of neuronal activity in a snail (KYRIAKIDES and MCCROHAN) **136**, 103
—Energetics of jumping in toads (WALTON and ANDERSON) **136**, 273
—Of kangaroo rats, muscle forces (BIEWENER, BLICKHAN, PERRY, HEGLUND and TAYLOR) **137**, 191

—Preferred speeds in terrestrial vertebrates (Perry, Blickhan, Biewener, Heglund and Taylor) **137**, 207
—Kinematics of swimming in *Idotea* (Alexander) **138**, 37
—Fish swimming kinematics (Webb) **138**, 51
—Mechanics and energetics in quadrupeds (Heglund and Taylor) **138**, 301
—Leg coordination in stick insects (Cruse and Schwarze) **138**, 455
—Energetics of, in salamanders (Full, Anderson, Finnerty and Feder) **138**, 471; (Feder) **138**, 487
—Of snakes (Jayne) **140**, 1
—Of kangaroo rats (Biewener and Blickhan) **140**, 243

Locust:
Chlorisondamine blocks muscle glutamate receptors (Ashford, Boden, Ramsey, Sansom, Shinozaki and Usherwood) **134**, 131
—Octopaminergic modulation of flight muscle (Whim and Evans) **134**, 247
—Role of motoneurones in steering behaviour (Baader) **134**, 455
—Effect of diet on chemoreceptor sensitivity (Abisgold and Simpson) **135**, 215
—Connections of hindwing tegulae with flight neurones (Pearson and Wolf) **135**, 381
—The kick (Heitler and Bräunig) **136**, 289
—Transport of proline in rectum (Meredith and Phillips) **137**, 341
—Ion transport in ileum (Irvine, Audsley, Lechleitner, Meredith, Thomson and Phillips) **137**, 361
—The neurotransmitter of ocellar photoreceptors (Simmons and Hardie) **138**, 205
—Ion-selectivity of glutamate-gated channels (Kits and Usherwood) **138**, 499
—Sensory convergence during flight (Hensler) **140**, 511

***Lolliguncula brevis*:**
Chromatophore motor fields in (Ferguson, Martini and Pinsker) **134**, 281
—Respiratory and cardiac performance (Wells, Hanlon, Lee and Dimarco) **138**, 17

Lophotoxin:
Blocks acetylcholine receptors in cockroach (Blagburn and Sattelle) **137**, 603

Luminescence:
Metabolic control of (Rees and Baguet) **135**, 289

Lungs:
Of the crocodile, functional morphology (Perry) **134**, 99
—Air flow in birds (Kuethe) **136**, 1
—Effect of removal in salamanders (Feder) **138**, 487

***Lymnaea stagnalis*:**
Modulation of feeding pattern (Tuersley and McCrohan) **135**, 473
—Neuronal coordination in (Kyriakides and McCrohan) **136**, 103

Magnetism:
Effect on homing of pigeons (Walcott, Gould and Lednor) **134**, 27

Magnetoreception:
In sockeye salmon (Mann, Sparks, Walker and Kirschvink) **140**, 35; (Walker, Quinn, Kirschvink and Groot) **140**, 51

Malpighian tubules:
Stimulation of transport (Maddrell and Overton) **137**, 265

***Manduca sexta*:**
Potassium transport by midgut epithelium (Moffett and Koch) **135**, 25, 39
—Inhibition of potassium current in midgut (Crawford and Harvey) **137**, 277
—Homeostasis in midgut (Dow and Harvey) **140**, 455

Mantle:
Fluid, role in mussel acid–base regulation (Heming, Vinogradov, Klerman and Komov) **137**, 501
—Electrophysiology of, in *Anodonta cygnea* (Coimbra, Machado, Fernandes, Ferreira and Ferreira) **140**, 65

Mast cells:
Stimulus–secretion coupling in (Penner and Neher) **139**, 329

Maximum lift coefficient:
Of vulture wings (Tucker) **140**, 325

Mechanical properties:
Of the mesoglea of *Polyorchis penicillatus* (DeMont and Gosline) **134**, 313

Mechanics:
Of gastropod grazing (Smith) **136**, 89
—Of animal locomotion (Heglund and Taylor) **138**, 301
—Of frog swimming (Gal and Blake) **138**, 399, 413

Mechanism:
Of dipteran flight (Miyan and Ewing) **136**, 229

Mechanoreceptors:
Hair cells in jellyfish (ARKETT, MACKIE and MEECH) **135**, 329
—Role in geotaxis of sea urchin larvae (MOGAMI, OOBAYASHI, YAMAGUCHI, OGISO and BABA) **137**, 141
***Melanoplus bivittatus*:**
Effect of temperature on acid–base status (HARRISON) **140**, 421
Membrane electrogenesis:
In insect skeletal muscle (DAWSON and DJAMGOZ) **136**, 417; (DJAMGOZ and DAWSON) **136**, 433
Membrane potential:
Of midgut epithelial cells in *Manduca sexta* (MOFFETT and KOCH) **135**, 25, 39
—In *Paramecium*, effect of light (MATSUOKA and NAKAOKA) **137**, 477
Mesoglea:
Mechanical properties of (DEMONT and GOSLINE) **134**, 313
Metabolic costs:
Of growth in toads (JØRGENSEN) **138**, 319
—Of locomotion in salamanders (FULL, ANDERSON, FINNERTY and FEDER) **138**, 471; (FEDER) **138**, 487
Metabolism:
Of amino acids in eels (ANDO) **138**, 93
—Of dormant snails (BARNHART and MCMAHON) **138**, 289
—Anaerobic, measurement of heat production (VAN WAVERSVELD, ADDINK, VAN DEN THILLART and SMIT) **138**, 529
—Of fish after stress (LACKNER, WIESER, HUBER and DALLA VIA) **140**, 393
Metamorphosis:
Changes in blood flow patterns in a salamander (MALVIN and HEISLER) **137**, 53
Microspheres:
Used to follow blood flow in swimming duck (BUTLER, TURNER, AL-WASSIA and BEVAN) **135**, 461
Mink:
Mustela vison, heart rate and gas exchange during diving (STEPHENSON, BUTLER, DUNSTONE and WOAKES) **134**, 435
Mitochondria:
Distribution in equine muscle (KAYAR, HOPPELER, ESSEN-GUSTAVSSON and SCHWERZMANN) **137**, 253
Modulation:
Of the pyloric network in *Palinurus vulgaris* (DICKINSON, NAGY and MOULINS) **136**, 53
—Of unpaired median neurones in *Antheraea* (BROOKES) **136**, 333
—Of pyloric motor patterns in a crustacean (MEYRAND and MOULINS) **138**, 107, 133
—Of the squid Schwann cell, effects of antagonists (EVANS and VILLEGAS) **138**, 259
Mollusc:
Swimming, non-spiking interneurones in the pedal ganglia (SPENCER) **134**, 443
—Measurement of heart rate (BUCHAN, PECK and TUBLITZ) **136**, 495
Morphometry:
Of horse muscle (KAYAR, HOPPELER, ESSEN-GUSTAVSSON and SCHWERZMANN) **137**, 253
—Of butterfly wings (BETTS and WOOTTON) **138**, 271
—Of the exocytotic event (MORRIS and POW) **139**, 81
Moths:
Effect of temperature on flight muscle potentials (ESCH) **135**, 109
—Latency of response to sex pheromones (BAKER and VOGT) **137**, 29
Motion perception:
In the pigeon (DAVIES and GREEN) **138**, 71
Motoneurone:
From a cockroach, effect of anoxia on action potential (PITMAN) **135**, 95
—Efficacy in *Aplysia* gill withdrawal movements (LUKOWIAK and COLEBROOK) **140**, 273
—In crayfish leg, central synaptic coupling (SKORUPSKI and SILLAR) **140**, 355
Motor fields:
Of chromatophores in squid (FERGUSON, MARTINI and PINSKER) **134**, 281
Motor pattern:
Modulation of, in *Palinurus vulgaris* (DICKINSON, NAGY and MOULINS) **136**, 53
—For the locust kick (HEITLER and BRÄUNIG) **136**, 289
—For walking in crayfish (SKORUPSKI and SILLAR) **140**, 355
—In the stump of an amputated cockroach leg (DELCOMYN) **140**, 465
Movement:
Measurement of, in insects (MIALL and HEREWARD) **138**, 541

***Musca domestica*:**
Effects of antagonists on putative histamine receptors in the fly visual neuropile (HARDIE) **138**, 221
Muscle:
Blocking of glutamate receptors by chlorisondamine, in locusts (ASHFORD, BODEN, RAMSEY, SANSOM, SHINOZAKI and USHERWOOD) **134**, 131
—Acid–base status in crayfish exposed to air (TYLER-JONES and TAYLOR) **134**, 409
—Smooth, action potentials in *Beroe ovata* (BILBAUT, MEECH and HERNANDEZ-NICAISE) **135**, 343
—Aerobic capacity of, in duck (TURNER and BUTLER) **135**, 445
—Membrane electrogenesis (DAWSON and DJAMGOZ) **136**, 417; (DJAMGOZ and DAWSON) **136**, 433
—Binding of phosphofructokinase to myofibrils (ROBERTS, LOWERY and SOMERO) **137**, 13
—Ontogenesis of contractile properties in a lizard (MARSH) **137**, 119
—Forces during locomotion in kangaroo rats (BIEWENER, BLICKHAN, PERRY, HEGLUND and TAYLOR) **137**, 191
—Forces in preferred gaits (PERRY, BLICKHAN, BIEWENER, HEGLUND and TAYLOR) **137**, 207
—Glutamate-gated channels in the locust (KITS and USHERWOOD) **138**, 499
—Activity during snake locomotion (JAYNE) **140**, 1
—Power output in dogfish (CURTIN and WOLEDGE) **140**, 187
—Stress during kangaroo rat locomotion (BIEWENER and BLICKHAN) **140**, 243
—Power output of crab scaphognathite (STOKES and JOSEPHSON) **140**, 287
—Activation of, in fish (ALTRINGHAM and JOHNSTON) **140**, 313
Mussel:
Amino acid fluxes in *Mytilus edulis* (RICE and STEPHENS) **135**, 275
—Acid–base regulation in *Margaritifera margaritifera* (HEMING, VINOGRADOV, KLERMAN and KOMOV) **137**, 501
Myoglobin:
Role in oxygen extraction in fish hearts (BAILEY and DRIEDZIC) **135**, 301
Myo-inositol:
Transport of, by lobster hepatopancreas (SIU and AHEARN) **140**, 107
***Mytilus edulis*:**
Amino acid fluxes (RICE and STEPHENS) **135**, 275
***Nautilus*:**
Response to ambient pressure (JORDAN, CHAMBERLAIN and CHAMBERLAIN) **137**, 175
Navigation:
Of homing pigeons (WALCOTT, GOULD and LEDNOR) **134**, 27
Nematocyst:
Of sea anemones, effects of ions on (HIDAKA and MARISCAL) **136**, 23
Nerve net:
Role in control of burrowing in a sea anemone (PICKENS) **135**, 133
Nerve terminals:
Optical studies of the secretory event (SALZBERG and OBAID) **139**, 195
—Laser light scattering and Doppler electrophoresis used to study function (SATTELLE) **139**, 233
Neural coordination:
In the pond snail (KYRIAKIDES and MCCROHAN) **136**, 103
Neuroethology:
Escape reflex of a tubificid worm (ZORAN and DREWES) **137**, 487
Neurohaemal organ:
In *Periplaneta americana*, presence of octopamine (FASS, SPERK, AGRICOLA, BAUMANN and PENZLIN) **135**, 495
Neurohormones:
In modulation of the crab pyloric rhythm (NUSBAUM and MARDER) **135**, 165
—In control of cockroach water loss (NOBLE-NESBITT and AL-SHUKUR) **136**, 451; **137**, 107
Neurohypophysis:
Secretion of oxytocin and vasopressin (BICKNELL) **139**, 51
—Pituicytes, glia and the control of secretion (HATTON) **139**, 67
Neuromodulation:
Of the crab pyloric rhythm (NUSBAUM and MARDER) **135**, 165
Neuronal oscillators:
In the crustacean stomatogastric system (MEYRAND and MOULINS) **138**, 107, 133
Neurosecretion:
Morphometry of (MORRIS and POW) **139**, 81
—By cultured pituitary cells (MCBURNEY and KEHL) **139**, 317
Neurotransmitter:
In the locust ocellus (SIMMONS and HARDIE) **138**, 205

Nicotinic receptor:
In cockroach, blocked by lophotoxin (BLAGBURN and SATTELLE) **137**, 603
Nociceptive cells:
Of the leech, specificity of connections formed in culture (VYKLICKY and NICHOLLS) **134**, 17
Noradrenaline:
Effect on proton extrusion from trout red cells (TETENS, LYKKEBOE and CHRISTENSEN) **134**, 267

Ocean pout:
Role of myoglobin in oxygen extraction in the heart (BAILEY and DRIEDZIC) **135**, 301
Ocellus:
Histamine is the neurotransmitter of the locust ocellar photoreceptor (SIMMONS and HARDIE) **138**, 205
—Synaptic transmission between second- and third-order neurones (MIZUNAMI and TATEDA) **140**, 557
Octopamine:
Modulatory actions on flight muscle in locusts (WHIM and EVANS) **134**, 247
—In the cockroach antennal heart (PASS, SPERK, AGRICOLA, BAUMANN and PENZLIN) **135**, 495
—Effects on a lepidopteran larva (BROOKES) **136**, 333
Octopus:
Visual acuity (MUNTZ and GWYTHER) **134**, 119
—Vibration sensitivity in the statocyst (WILLIAMSON) **134**, 451
—Visual discrimination of distance (MUNTZ and GWYTHER) **140**, 345
Olfaction:
Responses of moths to pheromones (BAKER and VOGT) **137**, 29
***Oncorhynchus kisutch*:**
Lactate levels at rest and after exercise (MILLIGAN and MCDONALD) **135**, 119
***Oncorhynchus nerka*:**
Biogenic magnetite in (MANN, SPARKS, WALKER and KIRSCHVINK) **140**, 35; (WALKER, QUINN, KIRSCHVINK and GROOT) **140**, 51
Ontogeny:
Of the feeding mechanism in salamanders (LAUDER and REILLY) **134**, 219
—Of muscle contractile properties in a lizard (MARSH) **137**, 119
Opioids:
In the paraventricular hypothalamus (LIGHTMAN) **139**, 31
—Receptors for, in the neurohypophysis (BICKNELL) **139**, 51
Optical recording:
Of transmembrane voltage at nerve terminals (SALZBERG and OBAID) **139**, 195
***Oreochromis mossambicus*:**
Intestinal transport of Na^+ and Cl^- (HOWARD and AHEARN) **135**, 65
—Intestinal transport of fatty acids (TITUS and AHEARN) **135**, 77
***Osmia rufa*:**
Colour vision of (MENZEL, STEINMANN, DE SOUZA and BACKHAUS) **136**, 35
Osmoregulation:
In an isopod (HOLLIDAY) **136**, 259
Otoliths:
Role in posture of goldfish (OTT and PLATT) **138**, 345, 359
Ouabain:
Stimulates transport in insect Malpighian tubules (MADDRELL and OVERTON) **137**, 265
Oxygen:
Analysis of, in mixed gas samples (KOZACIK) **135**, 499
—Dissolved in river water, measurement of (PRIEDE, SOLBÉ and NOTT) **140**, 563
Oxygen affinity:
Of haemocyanin, effect of freezing (MORRIS) **138**, 535
—Of foetal and adult snake haemoglobin (BERNER and INGERMANN) **140**, 437
Oxygen consumption:
Role of myoglobin in fish heart (BAILEY and DRIEDZIC) **135**, 301
—Of duck locomotory muscle (TURNER and BUTLER) **135**, 445
—By exercised fish heart (HOULIHAN, AGNISOLA, LYNDON, GRAY and HAMILTON) **137**, 565
Oxygen diffusion:
In equine muscle (KAYAR, HOPPELER, ESSEN-GUSTAVSSON and SCHWERZMANN) **137**, 253
Oxygen extraction:
In myoglobin-rich fish hearts (BAILEY and DRIEDZIC) **135**, 301
Oxygen transport:
By carp red cells (SALAMA and NIKINMAA) **136**, 405
Oxygen uptake:
Of horses, in response to exercise (EVANS and ROSE) **134**, 397

Oxyluciferin:
From a crustacean induces bioluminescence in a fish (THOMPSON, TOYA, NAFPAKTITIS, GOTO and TSUJI) **137**, 39

***Paralabrax nebulifer*:**
Binding of phosphofructokinase to myofibrils (ROBERTS, LOWERY and SOMERO) **137**, 13

***Paramecium*:**
bursaria, behavioural responses to light (IWATSUKI and NAITOH) **134**, 43
—*busaria*, phototaxis of (MATSUOKA and NAKAOKA) **137**, 477
—Motile responses of (ROBERTS and AL-RUDAINY) **138**, 517

***Parophrys vetulus*:**
Tissue ammonia distribution (WRIGHT, RANDALL and WOOD) **136**, 149

Pars intermedia:
Electrophysiology of neurosecretory cells (MCBURNEY and KEHL) **139**, 317

Pelicans:
Energetics of formation flight (HAINSWORTH) **135**, 431

Peptides:
Antagonists of their effects on the squid Schwann cell (EVANS and VILLEGAS) **138**, 259

Perfusion:
Of teleost intestinal mucosa (SUNDELL and BJÖRNSSON) **140**, 171

***Periplaneta americana*:**
Effect of anoxia on a motoneurone action potential (PITMAN) **135**, 95
—Ionic currents in cultured neurones (CHRISTENSEN, LARMET, SHIMAHARA, BEADLE and PICHON) **135**, 193
—Role of octopamine in the antennal heart (PASS, SPERK, AGRICOLA, BAUMANN and PENZLIN) **135**, 495
—Cephalic neuroendocrine control of water loss (NOBLE-NESBITT and AL-SHUKUR) **136**, 451
—Control of cercal position during flight (LIBERSAT and CAMHI) **136**, 483
—Role of terminal abdominal ganglion in water loss (NOBLE-NESBITT and AL-SHUKUR) **137**, 109
—Effect of lophotoxin on acetylcholine receptors (BLAGBURN and SATTELLE) **137**, 603
—Motor activity in a leg stump (DELCOMYN) **140**, 465
—Graded synaptic transmission (MIZUNAMI and TATEDA) **140**, 557

pH:
Compensation of, in *Bufo marinus* during hypercapnia (BOUTILIER and HEISLER) **134**, 79
—Effect on solubility of inert gases in fish blood (PELSTER, KOBAYASHI and SCHEID) **135**, 243
—Effect on sperm motility (MORISAWA and MORISAWA) **136**, 13
—Transmembrane gradients in fish during and after exercise (WRIGHT, RANDALL and WOOD) **136**, 149
—Tolerance to variation, in fish (FREDA and MCDONALD) **136**, 243
—Effect on lamprey blood (MATSOFF and NIKINMAA) **136**, 351
—Compensation of, in crayfish (BURTIN and MASSABUAU) **137**, 411
—Regulation of, in lepidopteran midgut (DOW and HARVEY) **140**, 455

Phentolamine:
Effect on a lepidopteran larva (BROOKES) **136**, 333

Pheromones:
Responses to, of flying moths (BAKER and VOGT) **137**, 29

Phosphofructokinase:
Binding to myofibrils in fish muscle (ROBERTS, LOWERY and SOMERO) **137**, 13

Phosphoinositides:
Role in signal transduction in secretory cells (PUTNEY) **139**, 135

Photokinesis:
Of *Paramecium* with a symbiotic green alga (IWATSUKI and NAITOH) **134**, 43

Photomechanical response:
Of the iris of the albino axolotl (BARR) **137**, 589

Photophore:
Coordination with eye movement in krill (GRINNELL, NARINS, AWBREY, HAMNER and HAMNER) **134**, 61
—Metabolic control of luminescence in (REES and BAGUET) **135**, 289

Photoreceptor:
In a solitary bee (MENZEL, STEINMANN, DE SOUZA and BACKHAUS) **136**, 35
—In *Paramecium* (MATSUOKA and NAKAOKA) **137**, 477

***Phyllactis concinnata*:**
Systems that control burrowing (PICKENS) **135**, 133

Pigeon:
Kinematics of flight (DIAL, KAPLAN, GOSLOW and JENKINS) **134**, 1
—Homing of (WALCOTT, GOULD and LEDNOR) **134**, 27
—Monitoring of flight paths (BRAMANTI, DALL'ANTONIA and PAPI) **134**, 467
—Role of legs in temperature regulation (MARTINEAU and LAROCHELLE) **136**, 193
—Head-bobbing behaviour (DAVIES and GREEN) **138**, 71
Pigments:
Regeneration of retinoids in the frog (AZUMA and AZUMA) **135**, 317
Plasticity:
Of pituicyte structure in the neurohypophysis (HATTON) **139**, 67
Plateau potentials:
In lobster gastric mill neurones (DICKINSON, NAGY and MOULINS) **136**, 53
***Platichthys stellatus*:**
Lactate levels at rest and after exercise (MILLIGAN and MCDONALD) **135**, 119
Plethysmography:
A simple pressure transducer, suitable for (LIGHTON) **134**, 429
Polyneuronal innervation:
Of teleost myotomal muscle (ALTRINGHAM and JOHNSTON) **140**, 313
***Polyorchis penicillatus*:**
Mechanics of jet propulsion (DEMONT and GOSLINE) **134**, 313
***Polyphemus*:**
Visually guided prey chases (YOUNG and TAYLOR) **137**, 387
—Chasing with a model eye (YOUNG) **137**, 399
***Porichthys notatus*:**
Metabolic control of photophore luminescence (REES and BAGUET) **135**, 289
—Induction of luminescence capability (THOMPSON, TOYA, NAFPAKTITIS, GOTO and TSUJI) **137**, 39
Position transducer:
Suitable for insects (MIALL and HEREWARD) **138**, 541
Posture:
In goldfish after labyrinthectomy (OTT and PLATT) **138**, 345, 359
Potassium transport:
By midgut epithelium in *Manduca sexta* (MOFFETT and KOCH) **135**, 25, 39
—In chicken intestine (GRUBB, BROWN and BENTLEY) **135**, 487
—In midgut of larval *Manduca sexta* (CRAWFORD and HARVEY) **137**, 277
—In locust ileum (IRVINE, AUDSLEY, LECHLEITNER, MEREDITH, THOMSON and PHILLIPS) **137**, 361
—In lepidopteran midgut (DOW and HARVEY) **140**, 455
Potentiometric probes:
Used to study excitation–secretion coupling (SALZBERG and OBAID) **139**, 195
Power:
Of dogfish muscle (CURTIN and WOLEDGE) **140**, 187
—Of crab respiratory muscle (STOKES and JOSEPHSON) **140**, 287
Predation:
Visually guided chases in *Polyphemus* (YOUNG and TAYLOR) **137**, 387
Pressor response:
In the turtle (HSIEH, PAN, KUO and CHAI) **140**, 405
Pressure:
A sensitive, solid-state transducer (LIGHTON) **134**, 429
—Effect on *Nautilus* behaviour (JORDAN, CHAMBERLAIN and CHAMBERLAIN) **137**, 175
Proline:
Transport in locust rectum (MEREDITH and PHILLIPS) **137**, 341
Proprioceptors:
In locust hindwings (PEARSON and WOLF) **135**, 381
Propulsion:
Mechanics of, in a jellyfish (DEMONT and GOSLINE) **134**, 313, 333, 347
Protein synthesis:
In fish heart (HOULIHAN, AGNISOLA, LYNDON, GRAY and HAMILTON) **137**, 565
Pulvillus:
Role in aphid adhesion (LEES and HARDIE) **136**, 309

Radiotransmitters:
Effects on bird body drag (OBRECHT, PENNYCUICK and FULLER) **135**, 265
Radula:
Kinetics during gastropod grazing (SMITH) **136**, 89
Receptors:
For histamine in the fly visual system, pharmacology of (HARDIE) **138**, 221

Recovery:
Of *Leuciscus cephalus* from handling stress (LACKNER, WIESER, HUBER and DALLA VIA) **140**, 393
Rectifying junctions:
In the leech central nervous system (ACKLIN) **137**, 1
Red blood cells:
Of fish, condition of (HUGHES and ALBERS) **138**, 523
—Of foetal and adult garter snakes (BERNER and INGERMANN) **140**, 437
Red pigment concentrating hormone:
Role in modulation of the crab pyloric rhythm (NUSBAUM and MARDER) **135**, 165
Reflexes:
Role in motor control of crayfish walking (SKORUPSKI and SILLAR) **140**, 355
Reptiles:
Carbon dioxide stores in (STINNER and WARDLE) **137**, 529
Resonance:
In the bell of a jellyfish (DEMONT and GOSLINE) **134**, 347
Respiration:
Carbonic anhydrase in gills of channel catfish (HENRY, SMATRESK and CAMERON) **134**, 201
—Discontinuous emission of CO_2 in an ant (LIGHTON) **134**, 363
—Responses of horses to exercise (EVANS and ROSE) **134**, 397
—Valving of air flow in bird lungs (KUETHE) **136**, 1
—Of *Xenopus* at different depths (SHANNON and KRAMER) **137**, 597
—Of squid (WELLS, HANLON, LEE and DIMARCO) **138**, 17
Retinoids:
Regeneration of, in the frog (AZUMA and AZUMA) **135**, 317
Rotation:
Of dipteran wings in flight (ENNOS) **140**, 161
Rubidium:
^{86}Rb as a tracer for potassium transport (GRUBB, BROWN and BENTLEY) **135**, 487

Salamanders:
Functional design of the feeding mechanism (LAUDER and REILLY) **134**, 219
—Blood flow patterns during metamorphosis (MALVIN and HEISLER) **137**, 53
—Exercising with and without lungs (FULL, ANDERSON, FINNERTY and FEDER) **138**, 471; (FEDER) **138**, 487
Salinity:
Effect on drinking rates of fish larvae (TYTLER and BLAXTER) **138**, 1
Salivary gland:
Secretory activity in leeches (MARSHALL and LENT) **137**, 89
—Electrophysiology of, in the leech (WUTTKE and BERRY) **138**, 431
***Salmo gairdneri*:**
Effects of catecholamines on extrusion of protons from red cells (TETENS, LYKKEBOE and CHRISTENSEN) **134**, 267
—Acid–base regulation following acute acidosis (TANG, NOLAN and BOUTILIER) **134**, 297
—Distribution of ammonia between plasma and red cells (WRIGHT, WOOD and RANDALL) **134**, 423
—High blood CO_2 levels in hypercapnia (DIMBERG) **134**, 463
—Effect of acid–base variables on trout hepatocytes (WALSH, MOMMSEN, MOON and PERRY) **135**, 231
—Motility of sperm (MORISAWA and MORISAWA) **136**, 13
—Acid–base and ionic exchanges after exercise (WOOD) **136**, 461
—Partitioning of cardiac output (ISHIMATSU, IWAMA and HEISLER) **137**, 75
—Effect of hyposmotic shock on hepatocytes (BIANCHINI, FOSSAT, PORTHÉ-NIBELLE, ELLORY and LAHLOU) **137**, 303
—Swimming kinematics (WEBB) **138**, 51
—Effects of catecholamines on erythrocytes (TUFTS, FERGUSON and BOUTILIER) **140**, 301
***Salmo trutta*:**
Exposure to variations in dissolved oxygen level (PRIEDE, SOLBÉ and NOTT) **140**, 563
Salt transport:
In tilapia intestine (HOWARD and AHEARN) **135**, 65
Scanning:
Movements of copepod eyes (LAND) **140**, 381
Scaphognathite:
Mechanical power of (STOKES and JOSEPHSON) **140**, 287
***Schistocerca gregaria*:**
Octopaminergic modulation of flight muscle (WHIM and EVANS) **134**, 247
—Role of motor neurones in steering behaviour (BAADER) **134**, 455

—Histamine is the photoreceptor neurotransmitter in the ocellus (SIMMONS and HARDIE) **138**, 205

Schwann cell:
Antagonists of peptidergic modulation in the squid (EVANS and VILLEGAS) **138**, 259

Sea anemone:
Control of burrowing behaviour (PICKENS) **135**, 133

—Effects of ions on nematocysts (HIDAKA and MARISCAL) **136**, 23

Seal:
Kinematics of swimming (FISH, INNES and RONALD) **137**, 157

Sea raven:
Role of myoglobin in oxygen extraction in the heart (BAILEY and DRIEDZIC) **135**, 301

Sea urchin:
Geotaxis of larvae (MOGAMI, OOBAYASHI, YAMAGUCHI, OGISO and BABA) **137**, 141

Second messengers:
Linking ion channels with exocytosis (MASON, RAWLINGS, COBBETT, SIKDAR, ZOREC, AKERMAN, BENHAM, BERRIDGE, CHEEK and MORETON) **139**, 287

Secretion:
By leech salivary gland cells (MARSHALL and LENT) **137**, 89

—Coupling to a stimulus (RINK and KNIGHT) **139**, 1

—Role of phosphoinositide metabolism (PUTNEY) **139**, 135

—Use of laser techniques to study nerve terminals (SATTELLE) **139**, 233

—The cytoskeleton as a barrier to exocytosis (AUNIS and BADER) **139**, 253

—Control of, in anterior pituitary cells (MASON, RAWLINGS, COBBETT, SIKDAR, ZOREC, AKERMAN, BENHAM, BERRIDGE, CHEEK and MORETON) **139**, 287

Secretory potential:
In the posterior silk glands of *Bombyx mori* (NAKAGAKI and SASAKI) **134**, 155

Sensory feedback:
Regulation of, in the flying cockroach (LIBERSAT and CAMHI) **136**, 483

—In the flying locust (HENSLER) **140**, 511

Serotonin:
Modulates patterned motor output in *Lymnaea stagnalis* (TUERSLEY and MCCROHAN) **135**, 473

—Effect on ionic currents in a snail neurone (FURUKAWA and KOBAYASHI) **137**, 319

Short-circuit current:
In lepidopteran midgut (CRAWFORD and HARVEY) **137**, 277

Silk gland:
Of *Bombyx mori*, secretory potential and ion transport (NAKAGAKI and SASAKI) **134**, 155

Simulation:
Of prey chases in *Polyphemus* (YOUNG) **137**, 399

Small intestine:
Of the grackle, presence of angiotensin converting enzyme (STEVENS, FERNANDEZ and MARTINEZ DEL RIO) **135**, 1

Snail:
Modulation of neuronal ionic currents (FURUKAWA and KOBAYASHI) **137**, 319

—Effect of hypercapnia on metabolism (BARNHART and MCMAHON) **138**, 289

Snake:
Muscular mechanisms of locomotion (JAYNE) **140**, 1

—Oxygen affinity of foetal and maternal red blood cells (BERNER and INGERMANN) **140**, 437

Sodium:
Balance in acid-stressed fish (FREDA and MCDONALD) **136**, 243

—Transport of, by an isopod gill (HOLLIDAY) **136**, 259

—Transport of, in insect Malpighian tubules (MADDRELL and OVERTON) **137**, 265

—Cotransport in locust rectum (MEREDITH and PHILLIPS) **137**, 341

—Transport in locust ileum (IRVINE, AUDSLEY, LECHLEITNER, MEREDITH, THOMSON and PHILLIPS) **137**, 361

Somatostatin:
Effects on somatotropes (THORNER, HOLL and LEONG) **139**, 169

Spectral sensitivity:
In a solitary bee (MENZEL, STEINMANN, DE SOUZA and BACKHAUS) **136**, 35

Speed:
Preferred, in terrestrial vertebrates (PERRY, BLICKHAN, BIEWENER, HEGLUND and TAYLOR) **137**, 207

Sperm:
Motility of, in fish (MORISAWA and MORISAWA) **136**, 13

***Spermophilus variegatus*:**
Role of fur structure in solar heat gain (WALSBERG) **138**, 243

***Squalus acanthias*:**
Uterine conditions in (KORMANIK) **137**, 443
—Ammonia transport across the gill (EVANS and MORE) **138**, 375
Squid:
Chromatophore motor fields (FERGUSON, MARTINI and PINSKER) **134**, 281
—Hydrodynamics of swimming (O'DOR) **137**, 421
—Respiratory and cardiac performance (WELLS, HANLON, LEE and DIMARCO) **138**, 17
—Antagonists of peptidergic modulation of the Schwann cell (EVANS and VILLEGAS) **138**, 259
Starling response:
Of fish heart (HOULIHAN, AGNISOLA, LYNDON, GRAY and HAMILTON) **137**, 565
Statocyst:
Vibration sensitivity in the octopus (WILLIAMSON) **134**, 451
Steering:
Role of motor neurones, in the locust (BAADER) **134**, 455
—In the flying locust (HENSLER) **140**, 511
Stick insect:
Pattern generation for walking (BÄSSLER) **136**, 125
—Leg coordination (CRUSE and SCHWARZE) **138**, 455
Stimulus–secretion coupling:
In secretory and nerve cells (RINK and KNIGHT) **139**, 1
—In anterior pituitary cells (MASON, RAWLINGS, COBBETT, SIKDAR, ZOREC, AKERMAN, BENHAM, BERRIDGE, CHEEK and MORETON) **139**, 267
—In excitable and non-excitable cells (PENNER and NEHER) **139**, 329
Stomatogastric system:
Of crustaceans, neuronal circuits of (MEYRAND and MOULINS) **138**, 107, 133
Stomatopod:
Ocular tracking by (CRONIN, NAIR, DOYLE and CALDWELL) **138**, 155
Stress:
In kangaroo rat muscles (BIEWENER, BLICKHAN, PERRY, HEGLUND and TAYLOR) **137**, 191
—Effect on carp red cells (FUCHS and ALBERS) **137**, 457
—Causes accumulation of opioids in the hypothalamus (LIGHTMAN) **139**, 31
—In kangaroo rat muscles, tendons and bones (BIEWENER and BLICKHAN) **140**, 243
—Effect on teleost metabolism (LACKNER, WIESER, HUBER and DALLA VIA) **140**, 393
Submergence:
Diving bradycardia in cormorants (JONES and LARIGAKIS) **136**, 499
—Cardiac response of tufted ducklings (KEIJER, BUTLER and WOAKES) **138**, 195
Substrate induction:
For bioluminescence (THOMPSON, TOYA, NAFPAKTITIS, GOTO and TSUJI) **137**, 39
Surface tension:
In aphid adhesion (LEES and HARDIE) **136**, 209
Sweat glands:
Microanalysis of, in horses (WILSON, ELDER, JENKINSON and MCWILLIAMS) **136**, 489
Swim bladder:
Concentrations of inert gases in (PELSTER, KOBAYASHI and SCHEID) **135**, 243
Swimming:
Mechanics of jet propulsion in a jellyfish (DEMONT and GOSLINE) **134**, 313, 333, 347
—Of a mollusc, non-spiking interneurones in the pedal ganglia (SPENCER) **134**, 443
—Aerobic capacity of duck muscle (TURNER and BUTLER) **135**, 445
—Regional blood distribution in duck (BUTLER, TURNER, AL-WASSIA and BEVAN) **135**, 461
—Kinematics of, in seals (FISH, INNES and RONALD) **137**, 157
—Hydrodynamics of, in squid (O'DOR) **137**, 421
—Of *Idotea*, kinematics (ALEXANDER) **138**, 37
—Of fish, kinematics (WEBB) **138**, 51
—Of frogs, biomechanics (GAL and BLAKE) **138**, 399, 413
Symbiosis:
Effect of *Chlorella* on light responses of *Paramecium* (IWATSUKI and NAITOH) **134**, 43
Synaptic transmission:
Graded, in the cockroach (MIZUNAMI and TATEDA) **140**, 557
Synergism:
Between two hypothalamic hormones (LEONG) **139**, 151
Synexin:
Human, sequence and properties of (POLLARD, BURNS and ROJAS) **139**, 267

Tannic acid:
Used to capture exocytosed granules (Morris and Pow) **139**, 81
Tegulae:
Of locust hindwings, connections with flight neurones (Pearson and Wolf) **135**, 381
Telemetry:
To measure dissolved oxygen concentration (Priede, Solbé and Nott) **140**, 563
Teleost fish:
An intestinal anion channel (Loretz and Fourtner) **136**, 383
—Effect of ammonia on acid–base balance (Claiborne and Evans) **140**, 89
—Activation of myotomal muscle (Altringham and Johnston) **140**, 313
Temperature:
Effect on insect flight muscle potentials (Esch) **135**, 109
—Regulation of, in flying pigeons (Martineau and Larochelle) **136**, 193
—Effect on carbon dioxide stores in reptiles (Stinner and Wardle) **137**, 529
—Effect on acid–base status in the grasshopper (Harrison) **140**, 421
Tendon:
Role in kangaroo rat locomotion (Biewener and Blickhan) **140**, 243
Thermal sweating:
In horses (Wilson, Elder, Jenkinson and McWilliams) **136**, 489
Thermoregulation:
Behavioural, by an arctic caterpillar (Kukal, Heinrich and Duman) **138**, 181
—Role of fur structure (Walsberg) **138**, 243
Thrust:
Produced by swimming seals (Fish, Innes and Ronald) **137**, 159
—Produced by swimming frogs (Gal and Blake) **138**, 413
Tiger musky:
Swimming kinematics (Webb) **138**, 51
Toad:
Acid–base regulation during hypercapnia (Boutilier and Heisler) **134**, 79
—Autonomic influences on heart rate and blood pressure (Wahlqvist and Campbell) **134**, 377
—Aerobic cost of jumping (Walton and Anderson) **136**, 273
—Metabolic costs of growth (Jørgensen) **138**, 319
Torsion:
In insect wings (Ennos) **140**, 137
Tracking:
Of visual targets by a stomatopod (Cronin, Nair, Doyle and Caldwell) **138**, 155
Training:
Effect on recovery from stress (Lackner, Wieser, Huber and Dalla Via) **140**, 393
Transducer:
For measurement of small pressure changes (Lighton) **134**, 429
Transepithelial potential difference:
Effect of lithium on frog skin (Baptista, Ramos and de Jesus) **135**, 51
Transport:
Of amino acids by the mussel (Rice and Stephens) **135**, 275
Trimethylamine:
Role in buoyancy of a pelagic crustacean (Sanders and Childress) **138**, 333
Turtle:
Vagal bradycardia (Hsieh, Pan, Kuo and Chai) **140**, 405

Ultrastructure:
Of lungs of *Crocodylus niloticus* (Perry) **134**, 99
—Of aphid adhesive organ (Lees and Hardie) **136**, 209
Unpaired neurones:
In *Antheraea pernyi* (Brookes and Weevers) **136**, 311; (Brookes) **136**, 333

Vagal escape:
In turtles (Hsieh, Pan, Kuo and Chai) **140**, 405
Vasopressin:
Role in modulation of ACTH release (Leong) **139**, 151
Ventilation:
Discontinuous, in an ant (Lighton) **134**, 363
—In compensation of extracellular pH in crayfish (Burtin and Massabuau) **137**, 411
Vestibular compensation:
In goldfish (Ott and Platt) **138**, 345, 359
Vibration sensitivity:
In the octopus (Williamson) **134**, 451

Vision:
Eye/photophore coordination in krill (GRINNELL, NARINS, AWBREY, HAMNER and HAMNER) **134**, 61
—Visual acuity in octopuses (MUNTZ and GWYTHER) **134**, 119
—Regeneration of frog visual pigments (AZUMA and AZUMA) **135**, 317
—In the bee *Osmia rufa* (MENZEL, STEINMANN, DE SOUZA and BACKHAUS) **136**, 35
—In predation by *Polyphemus* (YOUNG and TAYLOR) **137**, 387
—Tracking of moving objects by a crustacean (CRONIN, NAIR, DOYLE and CALDWELL) **138**, 155
—Pharmacology of fly histamine receptors (HARDIE) **138**, 221
—Distance discrimination by octopuses (MUNTZ and GWYTHER) **140**, 345
—Movements of copepod eyes (LAND) **140**, 381
Visual stimuli:
For landing response in *Drosophila* (WITTEKIND) **135**, 491

Walking:
In the stick insect (BÄSSLER) **136**, 125
—Leg coordination in the stick insect (CRUSE and SCHWARZE) **138**, 455
—Motor activity in an insect leg stump (DELCOMYN) **140**, 465
Water loss:
Neuroendocrine regulation of, in the cockroach (NOBLE-NESBITT and AL-SHUKUR) **136**, 451
—Of cockroaches, role of terminal abdominal ganglion (NOBLE-NESBITT and AL-SHUKUR) **137**, 107
Water transport:
Across the eel intestine (ANDO) **138**, 93
Weight:
Added, effects on kestrel flight (VIDELER, VOSSEBELT, GNODDE and GROENEWEGEN) **134**, 173; (VIDELER, GROENEWEGEN, GNODDE and VOSSEBELT) **134**, 185
Wind tunnel:
Used to estimate body drag of large birds (PENNYCUICK, OBRECHT and FULLER) **135**, 253
Wing:
Importance of torsion in insects (ENNOS) **140**, 137
—Rotation of, in dipteran flight (ENNOS) **140**, 161
Wingbeat frequency:
In flying insects (BYRNE, BUCHMANN and SPANGLER) **135**, 9
Wing loading:
Effect on flight in insects (BYRNE, BUCHMANN and SPANGLER) **135**, 9
—In dragonfly flight (AZUMA and WATANABE) **137**, 221
Work:
Of a crab respiratory muscle (STOKES and JOSEPHSON) **140**, 287

***Xenopus laevis*:**
Effect of depth on respiratory behaviour (SHANNON and KRAMER) **137**, 597
X-ray microanalysis:
Of equine sweat glands (WILSON, ELDER, JENKINSON and MCWILLIAMS) **136**, 489

Errata

Blood gases, and extracellular/intracellular acid–base status as a function of temperature in the anuran amphibians *Xenopus laevis* and *Bufo marinus*
By R. G. BOUTILIER, M. L. GLASS AND N. HEISLER
J. exp. Biol. **130**, 13–25.

Fig. 4. The label on the abscissa should read P_{O_2} (mmHg). The last sentence of the legend should read: Solid circles represent *in vivo* arterial blood P_{O_2} values ($\bar{x} \pm$ S.E.) for the respective temperature.

Effects of desiccation, water-stress and decapitation on integumentary water loss in the cockroach, *Periplaneta americana*
By JOHN NOBLE-NESBITT AND MARWAN AL-SHUKUR
J. exp. Biol. **131**, 289–300.

Figs 1–4. Left-hand ordinates should read: Water loss ($mg\,cm^{-2}$); right-hand ordinates should read: ($mg\,cm^{-2}\,mmHg^{-1}$).

Cover photograph

The Caribbean reef squid, *Sepioteuthis sepioidea*,
photographed in Annie Bight by Dr R. T. Hanlon.
